Further to your information request FOI/EIR 22/23-278 please find your question and our response below.

## **Request:**

1. The ICNIRP certificates issued for 5G masts in the Council's area.
2. The power output of each antenna in dbm or Watts for each 5G mast in the Council's area and the power intensity drop off calculations supplied by the applicants for any 5G beams emitted from such antennae, since 5G beams do not obey the inverse square law.
3. A copy of the section of the Council's public liability insurance policy showing indemnity cover for any potential personal injury claims which might be brought to the Council in relation to harm caused by wireless pulsed microwave radiation from this 5G technology; it is alleged that a USA telecom company is making provision for such claims in its statutory accounts and wireless technology has the same technical signature worldwide. For example, a 5G technical parameter is beam-forming.
4. The Environmental Impact Assessments conducted by the Council for 5G masts.

## **Response:**

1. Every mast approval application has an ICNRP certificate. These can all be viewed on the planning portal at: <https://pa.eastcambs.gov.uk/online-applications/>
2. Information Not Held
3. This is not specifically referenced in the Council's public liability insurance policy; however, we have spoken with our Insurers who have stated that it is not excluded.
4. The Council as planning authority does not carry out environmental assessments of each mast, it relies upon and scrutinises any information provided by applicants before determining each application.
