

Can you provide a breakdown of how much the council has spent on temporary accommodation in each of the last five financial years up to 2024 (2019/20-2023/24), broken down by provider.

By provider I mean the company contracted to provide this accommodation (of any type - hotel, b and b, caravan, private rented sector etc) to the council as part of its housing duty.

If the council has procured this accommodation from more than 5 providers in any given year, can you limit your search to the 5 companies that have received the most funding from the council.
