

Hi,

I would like to comment on the Witchford Neighbourhood Plan.

I would like to request that that land at the end of Meadow Close is added to the list of local green spaces. This may not have come through on the Neighbourhood Plan survey but the Parish Council should be aware of the strong feeling from local residents about protecting this area from development given the turn out at the relevant meetings when this area of land was put forward for development. The residents supported development at a nearby alternative site on the land off Common Road, this was put forward as an alternative and not as an addition. Now that development on this alternative site is going ahead it is important that Meadow Close field is protected from development in order to maintain green spaces in this area.

I feel that the current plan is vague about the future educational sites and the purpose of the Meadow Close land and is suggesting that this may be included as a potential site.

Kind Regards

Jane
