

MAIN CASE

Reference No: 17/00222/FUL

Proposal: Development of 3No. three bedroom bungalows

Site Address: Land Adjacent To 2 Houghtons Lane Isleham
Cambridgeshire

Applicant: Mr Jonathan Waters

Case Officer: Richard Fitzjohn, Planning Officer

Parish: Isleham

Ward: Isleham
Ward Councillor/s: Councillor Derrick Beckett

Date Received: 13 February 2017 **Expiry Date:** 14 June 2017

[S15]

1.0 RECOMMENDATION

1.1 Members are requested to APPROVE this application subject to the recommended conditions below:

- 1 Approved plans
- 2 Time Limit -FUL/FUM/LBC
- 3 Site Characterisation
- 4 Reporting of unexpected contamination
- 5 Archaeological Investigation
- 6 Sample materials
- 7 New footway provision
- 8 Car parking
- 9 Access drainage
- 10 Foul and Surface water drainage
- 11 Soft landscaping
- 12 Hard landscaping scheme
- 13 Biodiversity Improvements
- 14 Construction times

2.0 SUMMARY OF APPLICATION

2.1 Full planning permission is being sought for the erection of 3No. detached bungalows and garages.

2.2 Amended plans have been submitted during the course of this application to address topographical inaccuracies and officer concerns regarding surface water

drainage and boundary treatments. Additional plans have also been submitted during the course of the application to show the appearance of the proposed garages.

- 2.3 Pre-application advice was provided by the Planning Officer prior to submission of the formal planning application and a positive response to the principle of development on the site was given.
- 2.4 The full planning application, plans and documents submitted by the Applicant can be viewed online via East Cambridgeshire District Council's Public Access online service, via the following link <http://pa.eastcambs.gov.uk/online-applications/>. **Alternatively a paper copy is available to view at the East Cambridgeshire District Council offices, in the application file.**
- 2.5 This application has been called in to Planning Committee by Councillor Joshua Schumann as he believes, in the interest of openness and transparency, that due to the Chairman of the Parish Council and Ward Member having to declare a pecuniary interest, it would be best for the determination to be done in an open forum. Councillor Schumann also acknowledges that the planning committee considered an application in close proximity to the application site recently and, to be consistent, it would be best for this application to follow a similar pathway.

3.0 PLANNING HISTORY

- 3.1 On-site - There is no relevant planning history on the application site.
- 3.2 Off -site - Appleyard Farm, Houghtons Lane, Isleham - There is an extant planning permission for 1No. dwelling further east along Houghtons Lane at Appleyard Farm, approved in December 2015. There is also an outline planning application for 2 dwellings which is currently pending consideration at Appleyard Farm and being considered at the same Planning Committee meeting on 7th June 2017. These planning applications are referenced below:

15/01121/FUL	Proposed four bedroom dwelling	Approved
17/00550/OUT	Proposed for Two 2 storey dwellings, garaging, parking, access & associated site works.	Pending consideration

4.0 THE SITE AND ITS ENVIRONMENT

- 4.1 The application site is located outside of, but immediately adjacent to, the established development framework for Isleham. The site is located on the north side of Houghtons Lane, which comprises a single-track lane predominantly surrounded by open agricultural fields to the north, east and south.
- 4.2 There are two detached bungalows (No.4 East Fen Road and No.2 Houghtons Lane) located near to the vehicle junction with Sheldrick's Road, on the north side of

Houghtons Lane. There is also a 1.5 storey farm dwelling (Willow Cottage, No.4 Houghtons Lane) located on the north side of Houghtons Lane, to the eastern end of the single-track road.

- 4.3 There is a single-storey clunch barn, a two-storey farm dwelling (Appleyard Farm, No.1 Houghtons Lane) and agricultural buildings located on the south side of Houghtons Lane, directly opposite the application site. There is also an extant planning permission (15/01121/FUL) for 1No. dwelling on land to the east of Appleyard Farm which is not yet built. There is a garden to No.1 Sheldrick's Road which is located on the south side of Houghtons Lane, near to the vehicular junction with Sheldrick's Road.
- 4.4 The application site itself comprises part of an open, agricultural field with hedging and utility poles adjacent to the southern boundary along Houghtons Lane. There is also a shallow ditch adjacent to the southern boundary of the site which is largely hidden beneath undergrowth within the grass verge. This ditch does not connect to a watercourse. A single-storey residential bungalow (No.2 Houghtons Lane) is located immediately adjacent to the west boundary of the application site, with a low-level hedge bordering the application site. The north and east boundaries of the site are open to the agricultural field.

5.0 RESPONSES FROM CONSULTEES

- 5.1 Responses were received from the following consultees and these are summarised below. The full responses are available on the Council's web site.

5.1.1 Isleham Parish Council – Objection on grounds:

1. The plans are inaccurate:
 - The plots appear to be inaccurately positioned.
 - They do not include the existing clunch barn (IPC are trying to retain these character features within the village.
 - Doesn't reflect the need to remove the existing hedgerow.
 - Exaggerates the size of the road.
 - Doesn't identify the electricity pylons which are believed to have a detrimental effect on humans.
2. The application is outside of the villages development envelope and takes no account of the proposed Local Plan.
3. Houghtons Lane is no more than a simple, single-track, agricultural farm roadway. It is already in a very poor condition, does not include any street lighting and therefore simply does not fit for the additional traffic resulting from this proposed development.
4. The houses are not aesthetically interesting.
5. The proposed development does not meet current housing demands. There are sufficient houses within this style and price bracket already for sale within the village.

6. Approval of any houses on this particular site would almost certainly result in further applications being made.
7. This would have a detrimental effect on the local, natural environment.
8. The development doesn't protect the amenities and services of the neighbouring properties.
9. The development would overlook existing houses to the south and therefore result in a loss of privacy.

5.1.2 Ward Councillors - No Comments Received.

5.1.3 Middle Fen and Mere Internal Drainage Board – The application for development is outside the Middle Fen and Mere Internal Drainage District. The Board therefore have no comment to make.

5.1.4 Local Highways Authority – Original response - No objections in principle to the application. Recommend conditions are appended to any grant of planning permission in respect of access drainage and installation of a new footway the length of the development to connect to the existing highways footway.

Additional response - There appears to be an existing issue with surface water drainage along Houghtons Lane. It has been suggested that there is a ditch within the grass verge for highways surface water drainage. There is no running water, although some of the verge is used for filtration drainage. The creation of a footway would not be detrimental to highway drainage, if the following measures were installed within the highway verge:

- Installation of a highways surface water (French drain) drainage system to the rear of the footway. To consist of a perforated pipe and kerb gully channels (spaces appropriately) leading to discharge pipe runs to a perforated pipe the length of the footway. The details of this should be approved during the footway installation and be as per CCC standards - HERS 2013.

5.1.5 CCC Growth & Development - No Comments Received.

5.1.6 Environmental Health - Due to the proposed number of dwellings, advise that construction times and deliveries during the construction phase are restricted to the following:

08:00-18:00 Monday-Friday

08:00-13:00 Saturdays

None on Sundays, Bank Holidays or Public Holidays.

Accepts the findings of the Phase 1 Desk Study and Preliminary Risk Assessment report. The report recommends a limited soils investigation and soil gas testing. Therefore, advises that planning conditions are appended to any grant of planning permission requiring an appropriate contamination assessment to be carried out.

- 5.1.7 Waste Strategy (ECDC) - East Cambs will not enter private property to collect waste or recycling, therefore it would be the responsibility of the owners/residents to take any sacks/bins to the public highway boundary on the relevant collection day. East Cambridgeshire District Council as a Waste Collection Authority is permitted to make a charge for the provision of waste collection receptacles.
- 5.1.8 Trees Officer - This proposal is for three dwellings on existing agricultural land. There are some insignificant trees on the boundary of the verge with Houghtons Lane potentially affected. No tree details have been supplied. Does not formally object as no significant trees are impacted. However, raises concerns that the proposal will have a negative impact upon the landscape character of the area which would be in conflict with guidance within the local plan (ENV1: Landscape and settlement character). If the application is to be approved, recommends a full Landscaping Scheme with associated Landscaping Maintenance Schedule to be submitted under condition of planning approval (Conditions LS1A & LS3A), to ensure an effective design that accommodates the development within the landscape.
- 5.1.9 UK Power Networks - No Comments Received.
- 5.1.10 Cambridgeshire Archaeology - Does not object to the proposed development but considers that the site should be subject to a programme of archaeological investigation secured by planning condition due to a high probability of architectural finds in this location.
- 5.2 Neighbours – A site notice was displayed near the site and 4 neighbouring properties were notified. An advert was also placed in the Cambridge Evening News advertising the application as a departure from the development plan. Objection letters have been received from the occupiers of 7 nearby properties and the responses received are summarised below. A full copy of the responses are available on the Council’s website.
- Application is outside of the development envelope and infill locations within the village.
 - Extreme inaccuracy in both site location plan TAB215-01-697783 and plan as proposed TAB255-03-697725.
 - Road and junction is primarily for agricultural use and not fit / safe for the proposed additional traffic. The roads are very narrow and would create highway safety issues. Increase likelihood of cars reversing out of Houghtons Lane onto Sheldrick’s Road.
 - The Local Highway Authority has previously stated they would not be prepared to fund the construction of a standard carriageway along Houghtons Lane.
 - The road is prone to localised flooding. Houghtons Lane is a single-track road, which is in poor condition and frequently floods at the Sheldrick’s Road end due to poor drainage.
 - Removal of an established and wildlife rich hedgerow of over 20m in length and detrimental effect on wildlife.
 - Site is located directly below and adjacent to electricity pylons and transformers, potential health risks and EMF risks.
 - Detrimental effect to property, rural aspect and privacy of No.1 Sheldrick’s Road.
 - Change of landscape from rural to urban.

- No street lighting, security and safety risk as family homes. No pedestrian access on both sides of Houghton Lane.
- Proposed dwellings are not of high quality, fitting to the area or well balanced.
- The proposed housing does not meet the current demand for houses as there are already a number of 3 bed properties for sale in Isleham.
- The proposed development should be related to planning application 17/00223/FUL.
- Inaccurate / inconsistent details provided in the application for planning permission documentation.
- Inaccurate / inconsistent details provided in the planning and design statement.
- Alleged financial interest of nearby properties.
- Isleham is a small village with only one village shop and one school. School capacity in Isleham is already full to capacity and parking within the village centre, near churches and the co-op is already at a premium.
- Concerns regarding utilities. Existing issues with sewage system.

6.3 National Planning Policy Framework 2012

- 6 Delivering a wide choice of high quality homes
- 7 Requiring good design
- 11 Conserving and enhancing the natural environment

7.0 PLANNING COMMENTS

7.1 The main issues to consider when assessing this application are the principle of development, the character and appearance of the area, residential amenity, highway safety, ecology, archaeology and flood risk.

7.2 Principle of Development

- 7.2.1 The Council is not currently able to demonstrate that it has an adequate five year supply of land for housing. Therefore, all Local Planning policies relating to the supply of housing must be considered out of date and housing applications assessed in terms of the presumption in favour of sustainable development set out in the National Planning Policy Framework. This means that development proposals should be approved unless any adverse effects of the development significantly and demonstrably outweigh the benefits.
- 7.2.2 The benefits of this application are considered to be:- the positive contribution of the provision of an additional 3 dwellings to the district's housing stock and the positive contribution to the local and wider economy in the short term through the construction of the new dwellings.
- 7.2.3 Part Two of the Local Plan 'Village/Town Visions' identifies Isleham as having a wide range of services available locally including several shops; a primary school, three churches; sports facilities and good bus connections to Newmarket. The application site is located outside of, but adjacent to, the established development framework for Isleham, well-related to existing residential properties. Houghtons Lane is a 30mph speed limit road which is very lightly trafficked. The proposed development would provide a new footpath adjacent to the front of the application site which would connect to the existing footpath located along a small section of Houghtons Lane. The proposed development would therefore provide a safe pedestrian route into the centre of Isleham. For the purposes of assessing the proposal in relation to the presumption in favour of sustainable development, the site is considered to be in a sustainable location.
- 7.2.4 It should be noted that all other local plan policies and relevant material considerations remain relevant and form part of the planning balance for this application. The main considerations in determining this application are therefore; whether any adverse impacts would significantly and demonstrably outweigh the benefits of the development.

7.3 Character and appearance of the area

- 7.3.1 The location, sizes of the plots, and the scale and design of the proposed bungalows, would relate well to, and appear in keeping with, the existing plot sizes and bungalows located nearby to the west of the site on Houghtons Lane, Sheldrick's Lane and East Fen Road. It is therefore considered that the proposed development takes into account the existing character of the locality and the nearby housing densities.
- 7.3.2 As the application site is located within an edge of settlement location, the layout, scale, form, design and materials of any development should protect, conserve and where possible enhance existing landscape features and the visually sensitive settlement edge. Although it is accepted that the proposed dwellings would be visible within the surrounding rural landscape, the application site is not isolated and is located within close proximity to existing dwellings and built forms. Due to the physical relationship with existing residential dwellings, and taking into account that

the proposed dwellings would not extend beyond the built form that already exists in the vicinity of the site, it is considered that the addition of 3No. modestly sized single-storey dwellings as is proposed, would not be visually intrusive upon the character and appearance of the surrounding area.

7.3.3 The application form states that the proposed bungalows would be constructed of brickwork with pantile roofs, of a type and colour to match existing neighbouring properties. No specific details of materials have been submitted with the application, however a condition could be appended to any grant of planning permission requiring these details to be agreed with the Local Planning Authority prior to any above ground construction, in order to ensure that the final appearance of the proposed dwellings is acceptable.

7.3.4 On balance, it is considered that the proposal will not significantly or demonstrably harm the settlement edge, and subject to appropriate materials and an appropriate soft and hard landscaping scheme being agreed with the Local Planning Authority, the proposed development complies with Policies ENV1 and ENV2 of the Local Plan 2015.

7.4 Residential Amenity

7.4.1 The application site is located immediately adjacent to the east boundary of an existing residential bungalow (No.2 Houghtons Lane). Plot A of the proposed development would be located immediately adjacent to this neighbouring property and the proposed bungalow would be sited generally in line with the existing bungalow of No.2 Houghtons Lane. The proposed bungalow to Plot A would be distanced 2.4m from the west boundary with, and 8.4m from the existing dwelling of, No.2 Houghtons Lane at its closest point. Furthermore, the proposed bungalows would be single-storey, with modest heights of 5m at the ridge and 2.5m at the eaves. Due to the modest heights and single-storey nature of the proposed bungalows, in addition to their distances from existing residential properties, the proposed dwellings would not create a significant overbearing impact, a significant loss of light or create an unacceptable level of overlooking upon the existing neighbouring properties. The proposal will therefore adequately protect the residential amenity of neighbouring properties, in accordance with Policy ENV2 of the Local Plan.

7.4.2 The sizes of the plots and amenity space for each proposed dwelling accords with the guidelines of the East Cambridgeshire Design Guide and is adequate to ensure that the future occupiers will enjoy high standards of amenity.

7.5 Highway safety

7.5.1 The proposed development would create 3 new vehicular accesses off the north side of Houghtons Lane and would also provide an extension to the existing public footpath on the north side of Houghtons Lane, along the full frontage of the 3 proposed dwellings. Houghtons Lane is a 30mph speed limit road with minimal traffic. The Local Highway Authority has no objections to the application but

recommend conditions are appended to any grant of planning permission regarding access drainage and installation of the new footway. These recommended highway conditions are considered reasonable and could be appended to any grant of planning permission. It is therefore considered that the proposed development would not create a detrimental impact in respect of highway safety, in accordance with Policy COM7 of the Local Plan 2015.

7.5.2 Concerns have been received regarding the impact of the proposed development and the proposed public footpath extension on drainage of surface water from Houghtons Lane. It is believed that surface water drainage from the road is currently aided by the ditch adjacent to the front of the site. The Planning Officer has sought clarification from the Local Highway Authority as to the ownership of the ditch. The Local Highway Authority has provided a map which confirms the highway verge and ditch to the front of the site is within the ownership of the Local Highway Authority. The Local Highway Authority has provided an additional response following concerns raised about the drainage of surface water from the road. The additional response states that the creation of a footway would not be detrimental to highway drainage, if the following measures were installed within the highway verge:

- Installation of a highways surface water (French drain) drainage system to the rear of the footway. To consist of a perforated pipe and kerb gully channels (spaces appropriately) leading to discharge pipe runs to a perforated pipe the length of the footway. The details of this should be approved during the footway installation and be as per CCC standards - HERS 2013.

7.5.3 The applicant has been advised of the above footpath construction requirements and has agreed to the footpath being constructed to the Local Highway Authority's recommended specification.

7.5.4 The proposed development would accommodate two vehicle parking spaces within each plot, in accordance with Policy COM8 of the Local Plan 2015.

7.6 Ecology

7.6.1 The proposal includes the removal of some of the hedging along the south boundary of the site to accommodate the vehicular access to each dwelling. The Council's Tree Officer has been consulted on the application and considers the trees and vegetation on the site to be insignificant. The Tree Officer does not object to the application, however concerns have been raised regarding impact upon the landscape character of the area.

7.6.2 The application site predominantly comprises an open agricultural field which appears to be intensively farmed and unlikely to provide a significant ecological habitat. The site is bordered to the south and west by hedging. There is also a shallow ditch present beneath the hedging to the south of the site, however this is not a watercourse.

7.6.3 Concerns have been raised by occupiers of neighbouring properties regarding the impact of the proposed development upon local wildlife, however the site does not display any characteristics of being an important ecological habitat. Conditions

could be appended to any grant of planning permission requiring the provision of bird and bat boxes, in addition to soft landscaping, which could provide ecology enhancements.

7.6.4 It is therefore considered that the proposal accords with Policy ENV7 of the Local Plan.

7.7 Archaeology

7.7.1 Cambridgeshire County Council Archaeology has recommended that a condition is appended to any grant of planning permission requiring a programme of archaeological work to be undertaken in accordance with a written scheme of investigation to be agreed by the Local Planning Authority. Due to the site lying within an area of archaeological potential, this recommended condition is considered to be reasonable.

7.8 Flood Risk

7.8.1 The application site is located within Flood Zone 1 which is defined within Planning Practice Guidance as land with a low probability of flooding. In respect of flood risk, Planning Practice Guidance makes it clear that development is appropriate within Flood Zone 1. In addition, Policy ENV8 of the East Cambridgeshire Local Plan 2015 states that new development should normally be located in Flood Risk Zone 1.

7.8.2 Concerns have been raised from neighbouring occupiers regarding flood risk and drainage issues. However, the proposed dwelling would be located within an appropriate flood zone for development and the Local Planning Authority does not hold any evidence which would suggest the proposed development would be unacceptable in respect of flood risk. The application form states that surface water would be disposed of via soakaways. No details of the proposed soakaway have been submitted with the application, however a planning condition could be appended to any grant of planning permission prior requiring drainage details to be agreed with the Local Planning Authority prior to commencement of any development.

7.8.3 It is therefore considered that the proposal would not create any detrimental impacts in respect of flooding, in accord with Policy ENV8 of the Local Plan.

7.9 Planning Balance

7.9.1 The benefits of the proposal are the provision of 3 additional dwellings to the district's housing stock, in addition to the associated economic benefits from the construction process and continuing contribution to the local economy by future occupiers. These benefits attract significant weight in favour of the proposal in the planning balance.

7.9.2 Although the proposed development would have some impact upon the character and appearance of the area, the scale and appearance of the proposed bungalows have been sensitively designed to prevent significant and demonstrable harm being caused to the character and appearance of the area. Furthermore, subject to appropriate conditions, the proposed development would not give rise to any

unacceptable impacts in relation to residential amenity, highway safety, ecology, archaeology or flood risk.

7.9.3 On balance, it is considered that any adverse impacts would not significantly and demonstrably outweigh the benefits of the development and the proposal is therefore accords with the presumption in favour of sustainable development as set out in the National Planning Policy Framework. The proposal is therefore recommended for approval.

TAB255-SK02D	D	13th April 2017
TAB255-02		13th February 2017
PHASE I DESK STUDY		22nd February 2017
PLANNING AND DESIGN STATEMENT		13th February 2017

- 1 Reason: To define the scope and extent of this permission.
- 2 The development hereby permitted shall be commenced within 3 years of the date of this permission.
- 2 Reason: To comply with Section 91 of the Town and Country Planning Act 1990, as amended.
- 3 No development shall take place until an investigation and risk assessment of the nature and extent of any contamination on the site, whether or not it originates on the site, has been undertaken. The investigation and risk assessment must be undertaken by competent persons, and a written report of the findings must be submitted to and approved in writing by the Local Planning Authority. The report of the findings must include:
 - (i) A survey of the extent, scale and nature of contamination;
 - (ii) An assessment of the potential risks to: human health, property (existing or proposed) including buildings, crops, livestock, pets, woodland and service lines and pipes; adjoining land; groundwaters and surface waters; ecological systems; archaeological sites and ancient monuments;
 - (iii) An appraisal of remedial options, and proposal of the preferred option(s).This must be conducted in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11'. Any remediation works proposed shall be carried out in accordance with the approved details and timeframe as agreed in writing by the Local Planning Authority.
- 3 Reason: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors, in accordance with policy ENV9 of the East Cambridgeshire Local Plan 2015. The condition is pre-commencement as it would be unreasonable to require applicants to undertake this work prior to consent being granted.
- 4 In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported to the Local Planning

Authority within 48 hours. No further works shall take place until an investigation and risk assessment has been undertaken and submitted to and approved in writing by the Local Planning Authority. Where remediation is necessary, a remediation scheme must be submitted to and approved in writing by the Local Planning Authority. The necessary remediation works shall be undertaken, and following completion of measures identified in the approved remediation scheme a verification report must be prepared, and approved in writing by the Local Planning Authority.

- 4 Reason: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors, in accordance with policy ENV9 of the East Cambridgeshire Local Plan 2015.
- 5 No development shall take place within the area indicated until the applicant, or their agents or successors in title, has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved in writing by the local planning authority.
- 5 Reason: To ensure that any archaeological remains are suitably recorded in accordance with policy ENV14 of the East Cambridgeshire Local Plan 2015. The condition is pre-commencement as it would be unreasonable to require applicants to undertake this work prior to consent being granted.
- 6 No above ground construction shall take place on site until details of the external materials to be used on the development have been submitted to and approved in writing by the Local Planning Authority. Development shall be carried out in accordance with the approved details.
- 6 Reason: To safeguard the character and appearance of the area, in accordance with policy ENV2 of the East Cambridgeshire Local Plan 2015.
- 7 Prior to first occupation of any of the hereby approved dwellings, a new footway shall be installed the length of the development to connect the existing highways footway as per drawing no. TAB255-SK03B Revision B and constructed in accordance with the details specified on drawing no. TAB255-SK01C Revision D.
- 7 Reason: In the interests of highway safety, in accordance with policies COM7 and COM8 of the East Cambridgeshire Local Plan 2015.
- 8 Prior to first occupation of any of the hereby approved dwellings, the proposed on-site vehicle parking area shall be laid out, demarcated, levelled, surfaced and drained in accordance with the approved plans and thereafter retained for that specific use.
- 8 Reason: In the interests of highway safety, in accordance with policies COM7 and COM8 of the East Cambridgeshire Local Plan 2015.
- 9 The access and all hardstanding within the site shall be constructed with adequate drainage measures to prevent surface water run-off onto the adjacent public highway and retained in perpetuity.

- 9 Reason: In the interests of highway safety, in accordance with policies COM7 and COM8 of the East Cambridgeshire Local Plan 2015.
- 10 No development shall take place until a scheme to dispose of surface water has been submitted to and approved in writing by the Local Planning Authority. The scheme(s) shall be implemented prior to first occupation of the hereby approved dwellings.
- 10 Reason: To prevent the increased risk of flooding and to improve and protect water quality, in accordance with policies ENV2 and ENV8 of the East Cambridgeshire Local Plan 2015. The condition is pre-commencement as it would be unreasonable to require applicants to undertake this work prior to consent being granted.
- 11 Prior to first occupation of the hereby approved dwellings, a full schedule of all soft landscape works shall be submitted to and approved in writing by the Local Planning Authority. The schedule shall include, planting plans, a written specification; schedules of plants noting species, plant sizes, proposed numbers/densities; and a detailed implementation programme. It shall also indicate all existing trees and hedgerows on the land and details of any to be retained. The works shall be carried out in accordance with the approved details prior to the end of the first planting season following occupation of the development. If within a period of five years from the date of the planting, or replacement planting, any tree or plant is removed, uprooted or destroyed or dies, another tree or plant of the same species and size as that originally planted shall be planted at the same place, unless the Local Planning Authority gives its written consent to any variation.
- 11 Reason: To assimilate the development into its surroundings, in accordance with policies ENV1 and ENV2 of the East Cambridgeshire Local Plan 2015.
- 12 No development shall take place until full details of hard landscape works have been submitted to and approved in writing by the Local Planning Authority. These details shall include driveway surfacing materials. The works shall be carried out in accordance with the approved details prior to the occupation of any part of the development or in accordance with a programme agreed with the Local Planning Authority.
- 12 Reason: To safeguard the character and appearance of the area, in accordance with policy ENV2 of the East Cambridgeshire Local Plan 2015.
- 13 Prior to occupation a scheme of biodiversity improvements shall be submitted to and agreed in writing with the Local Planning Authority. The biodiversity improvements shall be installed prior to the first occupation of the hereby approved development and thereafter maintained in perpetuity.
- 13 Reason: To protect and enhance species in accordance with policies ENV1, ENV2 and ENV7 of the East Cambridgeshire Local Plan 2015.
- 14 Construction times and deliveries, with the exception of fit-out, shall be limited to the following hours: 08:00am - 18:00pm each day Monday-Friday, 08:00am - 13:00pm Saturdays and none on Sundays or Public Holidays.
- 14 Reason: To safeguard the residential amenity of neighbouring occupiers, in accordance with policy ENV2 of the East Cambridgeshire Local Plan 2015.

- 15 Prior to any work commencing on the site, a Construction Environmental Management Plan (CEMP) shall be submitted to and agreed in writing with the Local Planning Authority regarding mitigation measures for construction traffic. This shall include, but not be limited to, aspects such as access points, parking and turning for deliveries and site vehicles. The CEMP shall be adhered to at all times during all phases.
- 15 Reason: In the interests of highway safety and residential amenity, in accordance with policies COM7, COM8 and ENV2 of the East Cambridgeshire Local Plan 2015. The condition is pre-commencement as it would be unreasonable to require applicants to undertake this work prior to consent being granted.
